CORPORATE PROFILE

delegate.ai

AI agentic automation and autonomous business processes.

A Seventhsense Technologies company

Four ways we put AI to work

01 AI adoption study

Find where AI pays off first, and map the path to get there.

02 Agentic AI on your current ERP

AI agents that work with your existing ERP and other systems.

03 Rapid build of missing modules and processes

Any missing module or business process, built as an autonomous business process.

04 Autonomous business processes for industry

Ready-built AI-native products for specific industries.

Find where AI pays off first

A structured study that pinpoints real value and what it takes to get there.

Assess

Map current processes, systems and data readiness.

Identify

Spot high-value AI use cases across functions.

Prioritise

Rank each by impact, effort and risk.

Roadmap

A phased plan, with quick wins first.

The outcome: a clear, prioritised AI roadmap that fits your business.

Keep the systems you have

No rip-and-replace

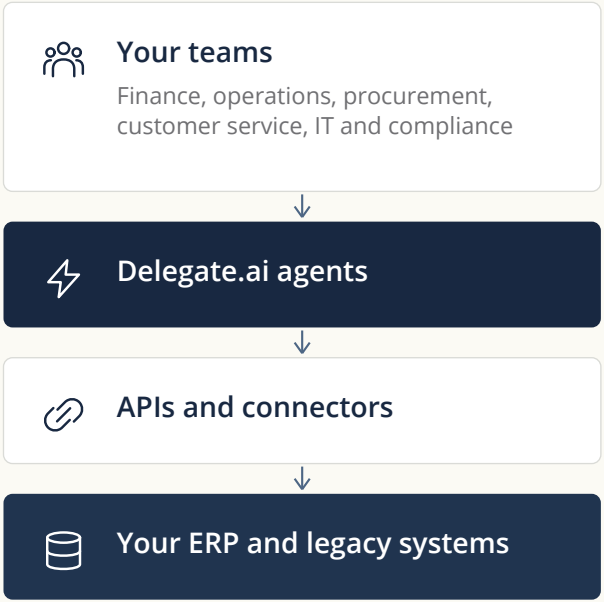

Agents connect to your current ERP and legacy systems through APIs and integrations.

Automate multi-step work

Agents read, decide and act across modules: orders, invoices, approvals and reports.

People stay in control

Approvals and an audit trail for every action an agent takes.

Manual/Excel to autonomous business processes

Evolve your operations while preserving what matters.

Area	Today: manual and Excel	Autonomous business processes
Data entry	Manual screens and forms	**Conversation and auto-capture**
Workflows	Fixed, hard-coded rules	**Agents that adapt and act**
Insight	Reports after the fact	**Real-time answers and alerts**
Change	Slow, costly customization	**Faster, AI-assisted change**
Know-how	Held in people's heads	**Captured in the system**

> **What carries over:** your data, processes and business rules, re-engineered for AI rather than lost.

Autonomous business processes for your industry

Purpose-built AI solutions that understand your business, workflows and standards.

Food

Recipes, material planning, production planning, food cost and wastage control, with agents that flag issues early.

Airlines

Budgeting, accounting, ground handling, duty-free shops and on-board sales, with agents that coordinate the work.

Hospitality

Bookings, guest services and back office, with agents that handle routine requests.

Fintech

Consolidation, intercompany, treasury and compliance, with agents that check, reconcile and report.

15+ years of industry ERP depth

15+

years building industry-specific ERPs

Part of Seventhsense Technologies

Bringing Seventhsense's enterprise software experience to AI.

Industry ERP specialists

ERPs built for Food, Airlines, Hospitality and Fintech.

Domain first, AI native

Deep process knowledge plus agentic AI, for solutions that work in practice.
